Universal remote with 2 AA batteries

HDMI cable
For HD customers only

Coax cable

Coax cable

Coax cable

Power cord

For DIY Videos, Activation and FAQs:
Go to www.comcast.com/selfinstall —or— scan
Connect a coax cable from your cable wall outlet to the **Cable In/RF In** connection on your set-top box. Make sure this connection is finger tight.

*You may only need one coax cable for your set-top box connection, so select the length that suits your needs.*

For the best HD picture quality, connect the HDMI cable from the **HDMI** connection on your HDTV to the **HDMI** connection on your set-top box.

*If you are using the HDMI cable, you will only use one coax cable for your set-top box connection.*

---Or---

Connect the other coax cable from the **Cable In/RF In** connection on your TV to the **To TV/RF Out** connection on your set-top box. Make sure this connection is finger tight.

Plug the power cord into your set-top box, then into an electrical outlet.

Refer to your XFINITY folder for alternate connection information.
2 POWER UP & ACTIVATE

Activate.

www.comcast.com/activate

Turn your TV on. Make sure that your TV is set to the proper input or channel (3 or 4).

To activate your service, you will need the Activation Information card found in your XFINITY folder.

If you have other XFINITY devices to connect, complete those connections now so you can activate all your devices at once.

To Activate:
www.comcast.com/activate —or—
1-855-OK-BEGIN (1-855-652-3446)

Don’t forget to program your remote control!
To program your remote to your TV, refer to the instructions with your remote. Or go to www.comcast.com/remotes.

Need help? For troubleshooting tips, go to www.comcast.com/selfinstall or refer to your XFINITY folder.
